# Flowi Task Management Tool

It is an easy-to-use system with Web and Mobile Applications where you can track your work, assign tasks to individuals or groups, and record and report the work done. It has a strong authorization and document management infrastructure. Each user can only see what they need to see and manage documents.

Some usage areas of the system:

A holding assigns action to approximately 2000 suppliers.
A chain market assigns work to all its branches from headoffice.
About 100 members of an association follow their work.
Employees of a university follow their work.
7000 students of a private teaching institution receive support from their teachers regarding the questions they cannot solve.
Task assignments are made to all staff of a hospital.
All employees of a manufacturing company keep track of their work
A municipality assigns task to all its employees.
A health clinic keeps track of its business.
A Holding HR Department assigns actions to company HR employees.
The business of a pharmacy is being followed.
Teachers of a private school share lesson notes and videos with students.

Problem Definition

- Easily track tasks on team members
- Location-independent working and transparency
- Notification of work in progress, completion or delay
